

```

Creating 1000 insects in parallel...
Creation finished in 11 ms.
Total insects in service: 1000

--- Fly Statistics ---
Min Wing Span: 0,00
Max Wing Span: 5,00
Average Wing Span: 2,50

--- General Insect Statistics ---
Min Legs: 6
Max Legs: 8
Average Legs: 7,00

Saving collection to file...

--- Running Synchronization Primitives Demos ---

--- Lock Demo ---
[Lock] Thread 0 added a value. List count is 1
[Lock] Thread 1 added a value. List count is 2
[Lock] Thread 2 added a value. List count is 3
[Lock] Thread 4 added a value. List count is 4
[Lock] Thread 3 added a value. List count is 5
[Lock] Thread 3 added a value. List count is 6
[Lock] Thread 1 added a value. List count is 7
[Lock] Thread 2 added a value. List count is 8
[Lock] Thread 0 added a value. List count is 9
[Lock] Thread 4 added a value. List count is 10
[Lock] Thread 4 added a value. List count is 11
[Lock] Thread 3 added a value. List count is 12
[Lock] Thread 2 added a value. List count is 13
[Lock] Thread 0 added a value. List count is 14
[Lock] Thread 1 added a value. List count is 15
[Lock] Final list count: 15

--- SemaphoreSlim Demo ---
[Semaphore] Thread 0 is waiting...
[Semaphore] >> Thread 0 has entered.
[Semaphore] Thread 2 is waiting...
[Semaphore] Thread 3 is waiting...
[Semaphore] Thread 4 is waiting...
[Semaphore] Thread 1 is waiting...
[Semaphore] >> Thread 2 has entered.
[Semaphore] << Thread 2 is leaving.
[Semaphore] << Thread 0 is leaving.
[Semaphore] >> Thread 3 has entered.
[Semaphore] >> Thread 4 has entered.
[Semaphore] << Thread 3 is leaving.
[Semaphore] >> Thread 1 has entered.
[Semaphore] << Thread 4 is leaving.
[Semaphore] << Thread 1 is leaving.

--- AutoResetEvent Demo ---
[AutoResetEvent] Main thread is doing some work...
[AutoResetEvent] Task is waiting for a signal...
[AutoResetEvent] Main thread is sending a signal.
[AutoResetEvent] Task received signal and finished.

--- Mutex Demo ---

```

```
--- Mutex Demo ---
[Mutex] Thread 0 is requesting the mutex.
[Mutex] >> Thread 0 has acquired the mutex.
[Mutex] Thread 1 is requesting the mutex.
[Mutex] Thread 2 is requesting the mutex.
[Mutex] << Thread 0 is releasing the mutex.
[Mutex] >> Thread 1 has acquired the mutex.
[Mutex] << Thread 1 is releasing the mutex.
[Mutex] >> Thread 2 has acquired the mutex.
[Mutex] << Thread 2 is releasing the mutex.

--- Monitor (Producer/Consumer) Demo ---
[Monitor] Produced 0
[Monitor] Consumed 0
[Monitor] Consumer is waiting...
[Monitor] Produced 1
[Monitor] Consumed 1
[Monitor] Consumer is waiting...
[Monitor] Produced 2
[Monitor] Consumed 2
[Monitor] Consumer is waiting...
[Monitor] Produced 3
[Monitor] Consumed 3
[Monitor] Consumer is waiting...
[Monitor] Produced 4
[Monitor] Consumed 4
[Monitor] Consumer is waiting...
[Monitor] Produced 5
[Monitor] Consumed 5
[Monitor] Consumer is waiting...
[Monitor] Produced 6
[Monitor] Consumed 6
[Monitor] Consumer is waiting...
[Monitor] Produced 7
[Monitor] Consumed 7
[Monitor] Consumer is waiting...
[Monitor] Produced 8
[Monitor] Consumed 8
[Monitor] Consumer is waiting...
[Monitor] Produced 9
[Monitor] Consumed 9
[Monitor] Consumer is waiting...
[Monitor] Consumer finished.
